COLLECTION 2017
Inspired by water

GICEEPO

Inspired by water

Giceepo as a brand has flourished and evolved with series of products that embody the changing lifestyles of its customers.

It has been always our goal to help you discover your own style, as well as to propose practical and reliable solutions. Thus we continually work to open before you the widest range of products. In this way, each of our faucets and shower systems can adapt to your individual taste and expectation and give an inspiration to design your home, business or leisure space. All of these goals share common values and requirements:

Modernity
Harmony
Convenience

Our products are designed and manufactured by Giceepo, which means we have control over all aspects, both creative and technical, to translate concepts into reality. Thus, you get a product that matches the most recent global trends and suits any kind of interior design, functional and tailored to what you deem convenient for everyday use. Our efforts were awarded many prizes and distinctions including the IF Product Design Award for Industrial Design Forum Hannover – the oldest industrial design agency in Germany. All of our products are approved by French, German and Polish Hygiene institutions, received EN817, and other European standards.

In 2011, Giceepo implemented the Quality Management system conforming to ISO 9001 standards.
